

Single-Use End Caps

Tri-Clamp® End Caps: Ensuring Durability and Integrity in Bioprocessing Applications

Our single-use end caps are engineered with Tri-Clamp® Connections. These components, made from durable, USP Class VI compliant materials, are designed to withstand the rigors of bioprocessing applications. Available sizes are ½-inch through 4-inches. Our end caps are lot traceable, gamma stable, BPE compliant and animal-derived ingredient free.

Our end caps are designed to coordinate with our elbows, tees and other components engineered and fabricated for single-use technology systems (SUTs). A cap securely closes off Tri-Clamp fittings to help prevent contamination or leaks and supply system integrity.

Adaptor Specifications

Part Number	Description	Dimension A	Dimension B
CAP-PP0075	3/4" End Cap in Polypropylene	0.984	0.197
CAP-PP0150	1.5" End Cap in Polypropylene	1.984	0.216
CAP-PP0200	2" End Cap in Polypropylene	2.516	0.222
CAP-PP0300	3" End Cap in Polypropylene	3.579	0.24
CAP-PP0400	4" End Cap in Polypropylene	4.682	0.205
CAP-PP0600	6" End Cap in Polypropylene	6.57	0.375
