

## Hose Barb Wyes

Explore Contour BioSolutions' Polypropylene Y Connectors for Single-Use Technology Systems

A Y connector in a single-use technology system (SUT) enables greater control over fluid pathways to either split or combine fluid flow paths. This helps separate or merge fluids according to the production needs while preserving system sterility, integrity and operational efficiencies.

Polypropylene Y connectors conform to our unwavering pursuit of excellence, harmoniously integrating with our complete range of elbows, tees, adaptors and other pivotal components crafted for SUTs. Within industries that require stringent hygienic standards, such as bioprocessing and pharmaceuticals, our parts, such as the Y connectors, stand out. All products are USP Class VI and BPE compliant, lot traceable, labeled and certified animal-derived ingredient-free.

### Hose Barb Wye Specifications

Part Number	Description
Y-HBPP0625	Wye, 1/16" hose barb in Polypropylene
Y-HBPP0125	Wye, 1/8" hose barb
Y-HBPP0025	Wye, 1/4" hose barb
Y-HBPP0375	Wye, 3/8" hose barb
Y-HBPP0050	Wye, 1/2" hose barb
Y-HBPP0075	Wye, 3/4" hose barb
